👁 Note!

Please note that there can be small differences between your product and the images in these instructions.

👁 Note!

Please note that during storage and transport, especially at high ambient temperature, some of the oil and grease used for assembly may leak and stain the packaging. This will not cause damage to the product, wipe off the excessive oil or grease with a cloth.

👁 Note!

Before you install this product, check the kit contents. If anything is missing, please contact an Öhlins dealer.

⚠ Warning!

Before you install this product, read the Öhlins Owner's manual. This product is an important part of the vehicle and the vehicle stability.

Shock Absorber Kit for Audi B8: A4/A5, S4/S5 & RS4/RS5

AUS MS00S1 front

Mounting Instructions

MOUNTING INSTRUCTIONS

⚠ Warning!

We strongly recommend to let an Öhlins dealer install this product.

⚠ Warning!

If you work with a lifted vehicle, make sure that it is safely supported to prevent it from tipping over.

👁 Note!

When you work with this product, see the vehicle service manual for vehicle specific procedures and important data.

👁 Note!

Before you install this product clean the vehicle.

1

Raise the vehicle and put it on jack stands.

2

Remove the front wheels.

3

Loosen the bolts for the lower strut attachments.

👁 Note!

Support the wheel hubs in an appropriate way on each side of the vehicle so that the brake hoses can not be damaged.

4

Loosen the upper attachments and remove the original struts from the car. If your OE top mount has a rubber positioned inside the OE top mount, remove it.

5

Install the dust boot (2), the plastic spacer (3), the spring (4), the rubber spacer (5), the upper spring seat (6), the 25mm spacer (7), the OE top mount assembly, the washer (8) and the M12 lock nut (9) according to fig 1. Tighten the lock nut to 35 Nm.

👁 Note!

When tightening the top mount nut, the shock absorber shaft must be held in position with an Allen key.

6

Position the lower spring seat and the lock ring according to fig 2 and tighten with the c-spanner.

Fig. 1

MOUNTING INSTRUCTIONS

7

Fasten the upper attachments.

8

Raise the wheel hub with a jack to remove the freeplay of the lower strut attachment bolts before tightening them.

Note!

Make sure that all bolts are tightened to the correct torque and that nothing fouls or restricts movement of the strut when it is being fully compressed or extended. Test this over the whole steering range from lock to lock. Some of the original bolts need to be replaced when removed. See the service manual for your vehicle or contact an Öhlins dealer.

9

Make sure that all removed parts are reinstalled in the same way as they were before the installation of the Öhlins shock absorber.

ADJUSTMENTS

⚠ Warning!

Before you ride/drive, always make sure that the setup is according to the recommended setup data. Read about adjustments and setting up in the Öhlins Owner's Manual before you make any adjustments. Contact an Öhlins dealer if you have any questions about setting up.

The recommended preload is 10 mm from a free length of 180 mm, giving 170 mm installed length, see fig. 2.

SETUP DATA

Rebound setting		
Track	2-7	clicks
Winding road	5-10	clicks
Street	10-20	clicks
Spring preload	2-15	mm

Recommended spring

49180-39 (120 N/mm)

The actual vehicle height

With the preload in their recommended position, the vehicle is lowered approximately 15mm when compared to the original suspension.

Depending on car model and equipment, the spring preload may vary. Adjust the spring preload until you have reached your desired ride height. Make sure that the spring is always preloaded.

Fig. 2

Öhlins products are subject to continuous improvement and development, therefore, although these instructions include the most up-to-date information available at the time of printing, minor updates may occur.
